

Alboraya, 14th of June 2018  
To whom it may concern

**Document Nº** : UWD-0001-0001-CAR-0001 Rev.B

**Subject** : Quality Policy

In October 2016, UNI-WELD has been created with the fundamental aim to give a service of quality, offering an innovative business model to our customers based in our training and experiences added values in welding field.

Working a personalized way for each Project of metallic construction, in different level of management :

- Externalized advising,
- Supervision,
- Staff delegation,
- Site service performance.

In addition, we can complete our services with process or welders homologations.

UNI-WELD bet supposes a constant inversion in term of equipment and qualified staff, which suppose a stretch relationship with our suppliers and technical collaborators.

Our organization is oriented toward all kind of Project captation, but we could underline especially Naval industry and Renewable Energy. Our scope of actuation is international, we are present in different countries and we can count on our integration in SYGMA GROUP, based in Switzerland.

For all of these reasons, UNI-WELD has decided to take a step forward in our engagement with the attention of our users and their surround by acquiring following engagements :

- Implant and sustain a Quality System, according to ISO 9001:2015 and ISO 3834-2 standards,
- Comply with actual legislation, and others engagements the company could decide to assume,
- Bring all resources necessaries to insure services, always looking towards vanguard technic and homologations,
- Raise awareness and train our staff in order to participate to Quality Management and customer attention,
- Sustain a constant relationship with our interested parties, including our suppliers, in order to manage efficiently their engagements,
- Be able to evaluate periodically Risks and Opportunities of our organization,
- Work dedicatedly to improve continuously our services.
